REFUELLING  
SOLUTIONS

## CREATING A SUSTAINABLE FUTURE

REFUELLING SOLUTIONS HAS BEEN ACTIVELY SUPPORTING THE BIOFUELS INDUSTRY FOR THE PAST 15 YEARS. THE LATEST AND MOST EXCITING CHAPTER IS THE PARTNERSHIP WITH **JUST BIODIESEL**, AUSTRALIA'S NEWEST BIODIESEL FACILITY, TO SUPPLY BIODIESEL AND BIODIESEL BLENDS TO THE AUSTRALIAN MARKET.

GREENHOUSE GAS  
**86% LESS**

PARTICULATE MATTER  
**47% LESS**

EMISSIONS  
**67% LESS**

### CLEAN BURNING

Biodiesel produces **86 PERCENT** fewer lifecycle greenhouse gases than petroleum diesel, creates **47 PERCENT** less particulate matter and reduces hydrocarbon emissions by **67 PERCENT**.

### WHAT IS BIODIESEL?

Biodiesel is a renewable, clean-burning diesel replacement that is reducing Australia's dependence on foreign petroleum, creating jobs and improving the environment.

It is made from a diverse mix of feedstocks including recycled cooking oil and animal fats.

Meeting strict technical fuel quality and engine performance specifications, it can be used in existing diesel engines without modification and is covered by all major engine manufacturers' warranties, most often in blends of up to 5% (B5) or 20% (B20) biodiesel.
